DETAILED ACTION

Withdrawal of Finality

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Response to Arguments

2. Applicant's arguments filed 6/30/2009 with respect to the 102 and 103 rejections have been fully considered and are persuasive. The 102 and 103 rejections of claims 1-11, 26-31, 35 and 37-48 have been withdrawn. However, the 112 rejection is maintained based on the arguments below.

The applicant maintains that the specification does provide adequate support for the limitation "directly and not via a controller in the equipment". The examiner, however, disagrees. Although the examiner does believe support is provided for direct communication as suggested in paragraphs 0003, 0012, 0014, 0029, 0033 and 0034, there is no support in the specification that the direct communication is negated from being directly connected via a controller. The claim only provides evidence of this limitation. Therefore, the 112 rejection stands as set forth below.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 2617

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-11, 26-30, 35 and 37-48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1-11, 26-30, 35 and 37-48 require providing "directly and not via a controller" a measurement.

However, upon review of the specification, this limitation is not described. The applicant is advised to amend the claims to overcome the 112 rejection.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
